PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, scalable web applications using JavaScript (ES6+), ReactJS, Redux, HTML5, and CSS3. Skilled in developing reusable UI components, managing client-side routing and state, and integrating RESTful APIs with Axios/Fetch. Comfortable with Git-based version control workflows in collaborative, agile environments. Quick to pick up new tools and frameworks, with a strong foundation in clean, maintainable, cross-browser-compatible front-end code.

TECHNICAL SKILLS

Core Frontend: HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, Cross-browser Compatibility, UI/UX Principles

Frameworks & Libraries: ReactJS, Redux / Redux Toolkit, React Router DOM, Bootstrap, Tailwind CSS, Reactstrap, Axios / Fetch API

Tools & Technologies: Git & GitHub, REST API Integration, Postman, Chrome DevTools

WORK EXPERIENCE

Web Developer

QAds

Jan 2026 – Present

Karaikudi, Tamil Nadu

- Developed scalable full-stack web applications using ReactJS, Reactstrap, PHP, and MySQL in an agile team environment.
- Built and maintained responsive UI components, ensuring cross-browser compatibility and optimal performance.
- Integrated front-end interfaces with RESTful backend APIs for efficient data handling and real-time updates.
- Implemented admin dashboards and business management systems, streamlining operational workflows.
- Collaborated with cross-functional teams including backend developers to deliver end-to-end features.

PROJECTS

Multi-Panel POS System | *ReactJS, PHP, MySQL*

- Developed a role-based POS platform in ReactJS with a PHP REST API and MySQL, dynamically routing users across 4 distinct panels based on 3 assigned roles.
- Designed normalized MySQL schemas and RESTful endpoints with protected routes enforcing role-level access control across admin, staff, and driver roles.
- Integrated a PHP-based automated reminder system to trigger pre-event notifications for scheduled admin meetings.

Business Owner Networking Platform | *ReactJS, PHP, MySQL, JWT, REST API*

- Implemented JWT-based authentication with invite-only onboarding via SMTP and 3-tier role management across admin, business, and staff users.
- Built an interest-weighted feed using user_interest_map scores and a mini CRM deal pipeline with dedicated messaging threads.

Room Booking Web Application | *HTML5, PHP, MySQL*

- Developed a scalable room booking web application with dynamic search, filtering, and real-time availability features using ReactJS and REST APIs.
- Designed and integrated a secure backend with PHP and MySQL, enabling seamless booking management and efficient user-to-owner communication.

EDUCATION

Mount Zion College of Engineering and Technology

B.E. in Computer Science and Engineering

2021 – 2025

CGPA: 8.51 / 10

CERTIFICATIONS

Web Development – Udemy | MySQL – Guvi
